

## Perennials for Dry Locations

The following is a list of plants that are tolerant of drier than usual soil conditions. This, however, does not mean that they do not need occasional water, especially for the first two weeks after planting, or during periods of long drought. Some of these plants are also better suited for extremely dry conditions than others; these are marked with an \*.

### Shade/Part Shade:

Aquilegia/Columbine  
Epimedium/Barrenwort  
Helleborus/Lenten Rose  
Hosta\*  
Lamiastrum/Yellow Archangel

Lamium/Dead Nettle\*  
Perennial Ferns  
Polygonatum/Solomon's Seal  
Sedum ternatum/Stonecrop\*

### Sun/Part Sun:

Achillea/Yarrow\*  
Agastache/Hyssop  
Alcea/Hollyhock  
Amsonia/Blue Star Flower  
Armeria/Thrift  
Artemisia/Worm-wood  
Asclepias tuberosa/Butterfly Weed  
Baptisia/False Indigo  
Ceratostigma/Lead-wort  
Delosperma/Ice Plant\*  
Dianthus/Garden Pinks  
Echinacea/Cone Flower  
Eryngium/Sea Holly  
Hemerocallis/Daylily\*  
Iberis/Candy Tuft  
Kniphofia/Red Hot Poker

Lavandula/Lavender\*  
Liatris/Gay feather  
Liriope/Lily Turf  
Lithodora  
Ophiopogon/Mondo Grass  
Panicum/Switch Grass  
Salvia/Sage\*  
Santolina/Lavender Cotton  
Saponaria/Soapwort  
Scabiosa/Pincushion Flower  
Sedum varieties/Stone Crop\*  
Stipa/Pony Tail Grass  
Thymus/Thyme\*  
Verbena  
Vernonia/Iron Weed
